

SS1 & SS2 Board reset procedure.

Door must be in OPEN position.

Flip switch OFF then ON

If the boltwork was in a locked position, it will open and the screen will display OPEN.

Flip switch OFF and ON again.

Screen will display **SECURE CODE**.

At the end of the message, enter numbers 920517 and then press **(LOCK or ENT)**

6 numbers will display, regardless of numbers displayed, enter 062001 in place of existing numbers. Then press **(LOCK or ENT)**

Another 6 numbers will display.

Regardless of numbers displayed,

Enter **128000** for model **SS2 safe** or
122000 for model **SS1 safe**

Wait for message to appear **CODE**

When message disappears enter the required operating code. e.g.
123456

The press **(LOCK or ENT)**

The boltwork will close.

Now use your operating code to open the boltwork.
