

The Micro 61 is Australia's most widely used data protection cabinet, providing fire protection to the highest standards.

Micro 61

FIRE RESISTANT DATA PROTECTION

Key features

- Tested independently to one of the world's toughest fire testing standards, the UL 72 Class 125 for one hour fire protection. Evidence of certification provided upon request.
- Available in a generous 60 litre capacity.
- High quality construction to ensure full protection of data media.
- Shock absorbing plinth ensures protection of data media even if the floor collapses due to the fire.
- Secured using a single keylock. Slam action locking system allows for immediate protection in the event of an emergency.
- Painted in a light grey finish to suit most office environments.
