

# LG BASIC

The LG Basic is an 'entry level' electronic safe and ATM lock. It provides full security at a base level price.

## FEATURES

- ⊕ Easy to use and reliable.
- ⊕ Push button access. 6-digit combination gives 1,000,000 possible permutations.
- ⊕ Enables two users: both manager and second user. Managers can control, lock out or delete the second user as required.
- ⊕ Wrong try penalty means that attempting to guess the combination more than 4 times will render the lock inactive for a period of 5 minutes.
- ⊕ The battery resides in the input pad for easy changeover. The lock will retain all settings when changing the battery.
- ⊕ Operates on a Duracell 9V alkaline battery which gives up to 2560 openings. Low battery level triggers an audible warning.
- ⊕ Unlike mechanical locks, codes are easy to change and therefore do not require a locksmith.
- ⊕ Keypad gives audio and visual signal for ease of use.
- ⊕ Environmentally tested from  $-10^{\circ}\text{C}$  to  $85^{\circ}\text{C}$ .
- ⊕ All vital components are located within the lock body for maximum security.

- ⊕ The swing bolt version has a patented automatic locking mechanism which locks when the safe handle is turned.
- ⊕ Certified to both Group 1 Underwriters Laboratory (UL) and European VDS KL2 manipulation proof rating. Please contact us for other approvals.
- ⊕ Can be retrofitted in place of mechanical locks and key locks.
- ⊕ Polyfuse provides unique protection to lock by protecting it against electric shock attacks.

## APPLICATIONS

- ⊕ Commercial safes
- ⊕ Quality domestic safes
- ⊕ Pistol and gun safes

## OPTIONS, VARIATIONS & ACCESSORIES

- ⊕ Available in deadbolt, swing bolt, spring bolt.
